**A Primer for Mathematics Competitions (Oxford Mathematics (Hardcover Unnumbered))** Alexander Zawaira, Gavin Hitchcock

The importance of mathematics competitions has been widely recognised for three reasons: they help to develop imaginative capacity and thinking skills whose value far transcends mathematics; they constitute the most effective way of discovering and nurturing mathematical talent; and they provide a means to combat the prevalent false image of mathematics held by high school students, as either a fearsomely difficult or a dull and uncreative subject. This book provides

a comprehensive training resource for competitions from local and provincial to national Olympiad level, containing hundreds of diagrams, and graced by many light-hearted cartoons. It features a large collection of what mathematicians call "beautiful" problems - non-routine, provocative, fascinating, and challenging problems, often with elegant solutions. It features careful, systematic exposition of a selection of the most important topics encountered in mathematics competitions, assuming little prior knowledge. Geometry, trigonometry, mathematical induction, inequalities, Diophantine equations, number theory, sequences and series, the binomial theorem, and combinatorics - are all developed in a gentle but lively manner, liberally illustrated with examples, and consistently motivated by attractive "appetiser" problems, whose solution appears after the relevant theory has been expounded.

Each chapter is presented as a "toolchest" of instruments designed for cracking the problems collected at the end of the chapter. Other topics, such as algebra, co-ordinate geometry, functional equations and probability, are introduced and elucidated in the posing and solving of the large collection of miscellaneous problems in the final toolchest.

An unusual feature of this book is the attention paid throughout to the history of mathematics - the origins of the ideas, the terminology and some of the problems, and the celebration of mathematics as a multicultural, cooperative human achievement.

As a bonus the aspiring "mathlete" may encounter, in the most enjoyable way possible, many of the topics that form the core of the standard school curriculum.

**From reader reviews:**

**Beatrice Pearson:**

What do you think about book? It is just for students as they are still students or the idea for all people in the world, exactly what the best subject for that? Merely you can be answered for that question above. Every person has different personality and hobby for every other. Don't to be pressured someone or something that they don't need do that. You must know how great and important the book A Primer for Mathematics Competitions (Oxford Mathematics (Hardcover Unnumbered)). All type of book are you able to see on many methods. You can look for the internet solutions or other social media.

**Catherine Acevedo:**

Reading can called mind hangout, why? Because while you are reading a book specifically book entitled A Primer for Mathematics Competitions (Oxford Mathematics (Hardcover Unnumbered)) your head will drift away trough every dimension, wandering in every single aspect that maybe not known for but surely might be your mind friends. Imaging just about every word written in a guide then become one application form conclusion and explanation which maybe you never get previous to. The A Primer for Mathematics Competitions (Oxford Mathematics (Hardcover Unnumbered)) giving you yet another experience more than blown away your thoughts but also giving you useful details for your better life in this era. So now let us teach you the relaxing pattern the following is your body and mind will probably be pleased when you are finished examining it, like winning a game. Do you want to try this extraordinary investing spare time activity?

**Delores Saenz:**

In this period of time globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. Typically the book that recommended for you is A Primer for Mathematics Competitions (Oxford Mathematics (Hardcover Unnumbered)) this book consist a lot of the information of the condition of this world now. This specific book was represented so why is the world has grown up. The language styles that writer make usage of to explain it is easy to understand. Typically the writer made some study when he makes this book. This is why this book suitable all of you.

**Lauren Smith:**

Some individuals said that they feel bored when they reading a guide. They are directly felt the idea when they get a half areas of the book. You can choose the particular book A Primer for Mathematics Competitions (Oxford Mathematics (Hardcover Unnumbered)) to make your reading is interesting. Your own personal skill of reading skill is developing when you just like reading. Try to choose basic book to

make you enjoy you just read it and mingle the feeling about book and reading through especially. It is to be very first opinion for you to like to start a book and examine it. Beside that the book A Primer for Mathematics Competitions (Oxford Mathematics (Hardcover Unnumbered)) can to be your new friend when you're sense alone and confuse in what must you're doing of that time.
