Meta-Analysis: A Structural Equation Modeling Approach

Mike W.-L. Cheung

Meta-Analysis: A Structural Equation Modeling Approach Mike W.-L. Cheung

Presents a novel approach to conducting meta-analysis using structural equation modeling.

Structural equation modeling (SEM) and meta-analysis are two powerful statistical methods in the educational, social, behavioral, and medical sciences. They are often treated as two unrelated topics in the literature. This book presents a unified framework on analyzing meta-analytic data within the SEM framework, and illustrates how to conduct meta-analysis using the metaSEM package in the R statistical environment.

Meta-Analysis: A Structural Equation Modeling Approach begins by introducing the importance of SEM and meta-analysis in answering research questions. Key ideas in meta-analysis and SEM are briefly reviewed, and various meta-analytic models are then introduced and linked to the SEM framework. Fixed-, random-, and mixed-effects models in univariate and multivariate meta-analyses, three-level meta-analysis, and meta-analytic structural equation modeling, are introduced. Advanced topics, such as using restricted maximum likelihood estimation method and handling missing covariates, are also covered. Readers will learn a single framework to apply both meta-analysis and SEM. Examples in R and in Mplus are included.

This book will be a valuable resource for statistical and academic researchers and graduate students carrying out meta-analyses, and will also be useful to researchers and statisticians using SEM in biostatistics. Basic knowledge of either SEM or meta-analysis will be helpful in understanding the materials in this book.

From reader reviews:

Harry Crawford:

Do you one among people who can't read gratifying if the sentence chained in the straightway, hold on guys that aren't like that. This Meta-Analysis: A Structural Equation Modeling Approach book is readable simply by you who hate the perfect word style. You will find the facts here are arrange for enjoyable studying experience without leaving actually decrease the knowledge that want to give to you. The writer involving Meta-Analysis: A Structural Equation Modeling Approach content conveys objective easily to understand by lots of people. The printed and e-book are not different in the articles but it just different by means of it. So , do you even now thinking Meta-Analysis: A Structural Equation Modeling Approach is not loveable to be your top collection reading book?

Carrie Hunter:

Reading a book for being new life style in this yr; every people loves to learn a book. When you go through a book you can get a large amount of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information in it. The information that you will get depend on what types of book that you have read. If you need to get information about your examine, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, such us novel, comics, in addition to soon. The Meta-Analysis: A Structural Equation Modeling Approach will give you a new experience in examining a book.

Angela Harris:

Many people spending their moment by playing outside along with friends, fun activity with family or just watching TV 24 hours a day. You can have new activity to spend your whole day by studying a book. Ugh, you think reading a book really can hard because you have to take the book everywhere? It okay you can have the e-book, bringing everywhere you want in your Smartphone. Like Meta-Analysis: A Structural Equation Modeling Approach which is obtaining the e-book version. So , try out this book? Let's view.

Matthew Haley:

A lot of book has printed but it takes a different approach. You can get it by net on social media. You can choose the most beneficial book for you, science, comic, novel, or whatever by simply searching from it. It is called of book Meta-Analysis: A Structural Equation Modeling Approach. You can contribute your knowledge by it. Without causing the printed book, it can add your knowledge and make a person happier to read. It is most important that, you must aware about publication. It can bring you from one location to other place.
