IPv6 Network Programming Jun-ichiro itojun Hagino

This book contains everything you need to make your application program support IPv6. IPv6 socket APIs (RFC2553) are fully described with real-world examples. It covers security, a great concern these days. To secure the Internet infrastructure, every developer has to take a security stance - to audit every line of code, to use proper API and write correct and secure code as much as possible. To achieve this goal, the examples presented in this book are implemented with a security stance. Also, the book leads you to write secure programs. For instance, the book recommends against the use of some of the IPv6 standard APIs - unfortunately, there are some IPv6 APIs that are inherently insecure, so the book tries to avoid (and discourage) the use of such APIs. Another key issue is portability. The examples in the book should be applicable to any of UNIX based operating systems, MacOS X, and Windows XP.

- * Covers the new protocol just adopted by the Dept of Defense for future systems
- * Deals with security concerns, including spam and email, by presenting the best programming standards
- * Fully describes IPv6 socket APIs (RFC2553) using real-world examples
- * Allows for portability to UNIX-based operating systems, MacOS X, and Windows XP

From reader reviews:

Eleanor Williams:

Nowadays reading books become more and more than want or need but also be a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge your information inside the book in which improve your knowledge and information. The details you get based on what kind of guide you read, if you want get more knowledge just go with knowledge books but if you want truly feel happy read one together with theme for entertaining such as comic or novel. The IPv6 Network Programming is kind of reserve which is giving the reader unpredictable experience.

Susanne Pineda:

Information is provisions for individuals to get better life, information presently can get by anyone at everywhere. The information can be a information or any news even an issue. What people must be consider while those information which is inside the former life are challenging to be find than now is taking seriously which one is acceptable to believe or which one typically the resource are convinced. If you have the unstable resource then you buy it as your main information we will see huge disadvantage for you. All of those possibilities will not happen in you if you take IPv6 Network Programming as the daily resource information.

Joan Stump:

People live in this new day time of lifestyle always attempt to and must have the time or they will get great deal of stress from both day to day life and work. So , whenever we ask do people have spare time, we will say absolutely yes. People is human not really a robot. Then we inquire again, what kind of activity are there when the spare time coming to you of course your answer can unlimited right. Then ever try this one, reading textbooks. It can be your alternative with spending your spare time, often the book you have read is IPv6 Network Programming.

Richard Harden:

That reserve can make you to feel relax. This specific book IPv6 Network Programming was vibrant and of course has pictures around. As we know that book IPv6 Network Programming has many kinds or variety. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and think that you are the character on there. Therefore not at all of book are usually make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book in your case and try to like reading that will.
