Reducing the Vulnerability of Moldova's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) William R. Sutton, Jitendra P. Srivastava, James E. Neumann, Ana Iglesias, Brent B. Boehlert

Agriculture is one of the most climate-sensitive of all economic sectors. In many countries, such as in Moldova, the risks of climate change are an immediate and fundamental problem because the majority of the rural population depends either directly or indirectly on agriculture for their livelihoods.

The risks of climate change to agriculture in Moldova cannot be effectively dealt with—and the opportunities cannot be effectively exploited—without a clear plan for aligning agricultural policies with climate change, developing the capabilities of key agricultural institutions, and making needed investments in infrastructure, support services and on-farm improvements. Developing such a plan ideally involves a combination of high-quality quantitative analysis, consultation with key stakeholders, particularly farmers and local agricultural experts, and investments in both human and physical capital. The experience of Moldova, highlighted in this work, shows that it is possible to develop a plan to meet these objectives—one that is comprehensive and empirically driven as well as consultative and quick to develop.

The approach of this study is predicated on strong country ownership and participation, and is defined by its emphasis on “win-win” or “no regrets” solutions to the multiple challenges posed by climate change for farmers in Moldova. The solutions are measures that increase resilience to future climate change, boost current productivity despite the greater climate variability already occurring, and limit greenhouse gas emissions.

Reducing The Vulnerability of Moldova's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options applies this approach to Moldova with the goal of helping the country mainstream climate change adaptation into its agricultural policies, programs, and investments. The study projects impacts of climate change on agriculture across Moldova’s three agro-ecological areas through forecast variations in temperature and rainfall patterns so crucial to farming. It offers a map for navigating the risks and realizing the opportunities, outlined through a series of consultations with local farmers. A detailed explanation of the approach is provided for those who would like to implement similar programs in other countries of Europe, Central Asia, or anywhere else in the world.

This is one of four country studies that were produced under the World Bank’s program, “Reducing Vulnerability to Climate Change in European and Central Asian Agricultural Systems”. The other countries included in this series are Albania, FYR Macedonia, and Uzbekistan. The results from the four studies are consolidated in the book *Looking Beyond the Horizon: How Climate Change Impacts and Adaptation Responses Will Reshape Agriculture in Eastern Europe and Central Asia* website..

From reader reviews:

Dennis Byrd:

This book untitled Reducing the Vulnerability of Moldova's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) to be one of several books this best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit on it. You will easily to buy this kind of book in the book retail store or you can order it by way of online. The publisher of this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Smartphone. So there is no reason to you personally to past this reserve from your list.

Mary Fleeman:

The book untitled Reducing the Vulnerability of Moldova's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) contain a lot of information on it. The writer explains your ex idea with easy approach. The language is very clear to see all the people, so do certainly not worry, you can easy to read it. The book was published by famous author. The author will take you in the new period of time of literary works. It is possible to read this book because you can continue reading your smart phone, or product, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site as well as order it. Have a nice go through.

Betty Perez:

As a student exactly feel bored in order to reading. If their teacher requested them to go to the library in order to make summary for some publication, they are complained. Just little students that has reading's heart or real their passion. They just do what the educator want, like asked to go to the library. They go to there but nothing reading really. Any students feel that reading through is not important, boring as well as can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Reducing the Vulnerability of Moldova's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) can make you really feel more interested to read.

William Moreau:

What is your hobby? Have you heard which question when you got college students? We believe that that query was given by teacher for their students. Many kinds of hobby, Every person has different hobby. And also you know that little person including reading or as studying become their hobby. You must know that reading is very important in addition to book as to be the issue. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You discover good news or update with regards to something by book. Different categories of books that can you decide to try be your object. One of them are
