Automatic trend estimation (SpringerBriefs in Physics)

C?alin Vamos, Maria Cr?aciun

Automatic trend estimation (SpringerBriefs in Physics) C?alin Vamos, Maria Cr?aciun

Our book introduces a method to evaluate the accuracy of trend estimation algorithms under conditions similar to those encountered in real time series processing. This method is based on Monte Carlo experiments with artificial time series numerically generated by an original algorithm. The second part of the book contains several automatic algorithms for trend estimation and time series partitioning. The source codes of the computer programs implementing these original automatic algorithms are given in the appendix and will be freely available on the web. The book contains clear statement of the conditions and the approximations under which the algorithms work, as well as the proper interpretation of their results. We illustrate the functioning of the analyzed algorithms by processing time series from astrophysics, finance, biophysics, and paleoclimatology. The numerical experiment method extensively used in our book is already in common use in computational and statistical physics.

From reader reviews:

Jordan Sampson:

Why don't make it to become your habit? Right now, try to prepare your time to do the important work, like looking for your favorite book and reading a publication. Beside you can solve your trouble; you can add your knowledge by the reserve entitled Automatic trend estimation (SpringerBriefs in Physics). Try to stumble through book Automatic trend estimation (SpringerBriefs in Physics) as your friend. It means that it can for being your friend when you truly feel alone and beside associated with course make you smarter than previously. Yeah, it is very fortunated for yourself. The book makes you considerably more confidence because you can know every thing by the book. So , let's make new experience along with knowledge with this book.

Brandon Riddle:

Book is to be different for each and every grade. Book for children until eventually adult are different content. As it is known to us that book is very important for us. The book Automatic trend estimation (SpringerBriefs in Physics) ended up being making you to know about other expertise and of course you can take more information. It doesn't matter what advantages for you. The book Automatic trend estimation (SpringerBriefs in Physics) is not only giving you far more new information but also being your friend when you truly feel bored. You can spend your current spend time to read your guide. Try to make relationship while using book Automatic trend estimation (SpringerBriefs in Physics). You never feel lose out for everything if you read some books.

Martin McDaniel:

That book can make you to feel relax. That book Automatic trend estimation (SpringerBriefs in Physics) was vibrant and of course has pictures on there. As we know that book Automatic trend estimation (SpringerBriefs in Physics) has many kinds or category. Start from kids until youngsters. For example Naruto or Detective Conan you can read and think you are the character on there. So , not at all of book are generally make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading that will.

Stephen Lee:

A lot of guide has printed but it is unique. You can get it by online on social media. You can choose the most effective book for you, science, comic, novel, or whatever through searching from it. It is called of book Automatic trend estimation (SpringerBriefs in Physics). You'll be able to your knowledge by it. Without causing the printed book, it could add your knowledge and make you happier to read. It is most crucial that, you must aware about guide. It can bring you from one spot to other place.
