Mobile, Wireless, and Sensor Networks: Technology, Applications, and Future Directions Rajeev Shorey, A. Ananda, Mun Choon Chan, Wei Tsang Ooi

This publication represents the best thinking and solutions to a myriad of contemporary issues in wireless networks. Coverage includes wireless LANs, multihop wireless networks, and sensor networks. Readers are provided with insightful guidance in tackling such issues as architecture, protocols, modeling, analysis, and solutions. The book also highlights economic issues, market trends, emerging, cutting-edge applications, and new paradigms, such as middleware for RFID, smart home design, and "on-demand business" in the context of pervasive computing.

Mobile, Wireless, and Sensor Networks is divided into three distinct parts:

- * Recent Advances in Wireless LANs and Multihop Wireless Networks
- * Recent Advances and Research in Sensor Networks
- * Middleware, Applications, and New Paradigms

In developing this collected work, the editors have emphasized two objectives:

- * Helping readers bridge the gap and understand the relationship between practice and theory
- * Helping readers bridge the gap and understand the relationships and common links among different types of wireless networks

Chapters are written by an international team of researchers and practitioners who are experts and trendsetters in their fields. Contributions represent both industry and academia, including IBM, National University of Singapore, Panasonic, Intel, and Seoul National University.

Students, researchers, and practitioners who need to stay abreast of new research and take advantage of the latest techniques in wireless communications will find this publication indispensable. Mobile, Wireless, and Sensor Networks provides a clear sense of where the industry is now, what challenges it faces, and where it is heading.

From reader reviews:

Charles Alexander:

Do you have favorite book? For those who have, what is your favorite's book? Reserve is very important thing for us to find out everything in the world. Each book has different aim as well as goal; it means that reserve has different type. Some people feel enjoy to spend their a chance to read a book. They may be reading whatever they get because their hobby is actually reading a book. Consider the person who don't like studying a book? Sometime, person feel need book after they found difficult problem as well as exercise. Well, probably you will need this Mobile, Wireless, and Sensor Networks: Technology, Applications, and Future Directions.

Jocelyn Harper:

Do you one among people who can't read enjoyable if the sentence chained inside straightway, hold on guys this specific aren't like that. This Mobile, Wireless, and Sensor Networks: Technology, Applications, and Future Directions book is readable by means of you who hate those straight word style. You will find the details here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to deliver to you. The writer regarding Mobile, Wireless, and Sensor Networks: Technology, Applications, and Future Directions content conveys the thought easily to understand by most people. The printed and e-book are not different in the articles but it just different in the form of it. So , do you continue to thinking Mobile, Wireless, and Sensor Networks: Technology, Applications, and Future Directions is not loveable to be your top list reading book?

Wilbert York:

Often the book Mobile, Wireless, and Sensor Networks: Technology, Applications, and Future Directions will bring someone to the new experience of reading a book. The author style to explain the idea is very unique. In case you try to find new book to see, this book very suited to you. The book Mobile, Wireless, and Sensor Networks: Technology, Applications, and Future Directions is much recommended to you you just read. You can also get the e-book through the official web site, so you can quicker to read the book.

Marylou Beauregard:

As a student exactly feel bored to help reading. If their teacher requested them to go to the library in order to make summary for some book, they are complained. Just small students that has reading's spirit or real their hobby. They just do what the teacher want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that reading is not important, boring and can't see colorful images on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Mobile, Wireless, and Sensor Networks: Technology, Applications, and Future Directions can make you sense more interested to read.
