## **Integrated Sustainable Design of Buildings** Paul Appleby

*Integrated Sustainable Design of Buildings* aims to provide a guide to members of design and masterplanning teams on how to deliver sustainable development and buildings cost effectively, meeting current and emerging UK and international statutory and planning requirements. Using a series of case histories and examples from the author's ten years of providing sustainability advisory services the book sets out a clear and understandable strategy that deals with all aspects of sustainable design and construction and the implications for delivery, costs, saleability and long term operation. The extensive scope includes all aspects of environmental, social and economic sustainability, including strategies to reduce carbon emissions and the impact of climate change.

*Integrated Sustainable Design of Buildings* appeared in the Cambridge Top 40 Sustainability Books of 2010.
