Campin' and Computin': A basic guide for RV'ers new to computers Eric Anderson
This book is written for those who are new to computers as well as those who are veteran computer users. Everyone will get a lot out of this book, but those not overly familiar with Windows based computers will have the most to gain from it. If you were given a computer by your family but you are not quite sure what to do with it or how to use it, this book is for you! If you know how to use your computer, but are not familiar with backups and other maintenance tasks, this book will be a valuable resource. The information in the book is presented in the format of parallels with the RVing life style. For instance, the way information is stored on the hard drive of your computer is compared to the way information might be stored in a recipe card index. Some of the topics covered in the book include but are not limited to: What makes up a computer (what are all the parts), what should you expect to pay for accessories, how to manage music files. It also explains how to manage picture files, how to back up your hard drive, how to protect your computer from viruses and how to protect your computer from a power surges. It also discusses other precautions to take in winter conditions. This book, filled with over 100 pictures, will give you all you need to know about a wide range of topics when it comes to picking and operating our personal computer. You might also like to check out my second book 'Tools for your office on wheels' if you want to use Microsoft Office. Happy camping! Eric Anderson
