Energy is essential for the economic growth of a nation. Its absence or deficiency makes a nation highly vulnerable to international arms twisting as well as internal disturbances. As such, it is an important element in a nation's security matrix. India which is in the lower half of the countries as far as the energy consumption per capita is concerned. One of major reasons is the gap between the demand and the capacity of the country to supply the energy from indigenous sources. One of the important sources that hold promise in Indian context is the nuclear energy as it is clean and the resource; thorium to produce power through this route is available indigenously. However despite a well developed plan for energy conversion in place, using indigenous resources for over half a century, it is still considered only promising. Relevant questions in this regard are; whether perceived promise is realizable? If so, in what time frame and at what cost? Will it be safe keeping in view its capacity to cause wide spread devastation? Is there a need to seek technical collaboration with other countries or will it be better to go indigenous route only? How do we tackle the widening demand- supply gap during the interim? And finally is there a case for a review for the existing decision loop/energy management system? An attempt has been made in this book to address these issues. It is also expected that the concept advocated in this book for achieving energy security for India by 2030 will initiate a wider debate on the subject.

From reader reviews:

Rachel Louviere:

Now a day people that Living in the era where everything reachable by connect with the internet and the resources included can be true or not call for people to be aware of each information they get. How individuals to be smart in acquiring any information nowadays? Of course the correct answer is reading a book. Studying a book can help persons out of this uncertainty Information particularly this Nuclear Energy in India's Energy Security Matrix: An Appraisal book as this book offers you rich data and knowledge. Of course the knowledge in this book hundred percent guarantees there is no doubt in it you probably know this.

Dean Rakestraw:

Information is provisions for those to get better life, information presently can get by anyone with everywhere. The information can be a understanding or any news even a concern. What people must be consider if those information which is inside the former life are difficult to be find than now's taking seriously which one would work to believe or which one the particular resource are convinced. If you obtain the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All those possibilities will not happen in you if you take Nuclear Energy in India's Energy Security Matrix: An Appraisal as your daily resource information.

Cindi Russell:

The particular book Nuclear Energy in India's Energy Security Matrix: An Appraisal has a lot details on it. So when you make sure to read this book you can get a lot of gain. The book was compiled by the very famous author. The author makes some research previous to write this book. This specific book very easy to read you can obtain the point easily after perusing this book.

Sarah Lopez:

As a student exactly feel bored for you to reading. If their teacher asked them to go to the library or make summary for some publication, they are complained. Just small students that has reading's spirit or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that reading is not important, boring in addition to can't see colorful pics on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Nuclear Energy in India's Energy Security Matrix: An Appraisal can make you sense more interested to read.
